	Wood Thrush		1
	Veery	1	
	American Robin	1	
	Red-eyed Vireo	1	2
	Black-throated Blue Warbler	1	
	Ovenbird	1	1
	Canada Warbler	1	
	Scarlet Tanager	1	
	Rose-breasted Grosbeak		1
	White-throated Sparrow		1
2	Yellow-bellied Sapsucker	1	
	Least Flycatcher	1	
	Black-capped Chickadee	1	1
	White-breasted Nuthatch		1
	Winter Wren		1
	Veery	1	
	Wood Thrush	1	
	American Robin	1	2
	Red-eyed Vireo	1	1
	Black-throated Green Warbler		1
	American Redstart	2	2
Ovenbird	3	3	
3	Yellow-bellied Sapsucker	1	1
	Hairy Woodpecker		1
	Least Flycatcher		1
	American Crow	1	1
	Veery	1	
	Hermit Thrush	1	
	Wood Thrush	1	1
	American Robin	2	1
Red-eyed Vireo	1	1	

	Black-throated Green Warbler		1
	American Redstart		1
	Ovenbird	2	2
	Scarlet Tanager		1
	Rose-breasted Grosbeak	1	1
4	Yellow-bellied Sapsucker	1	1
	American Crow	1	1
	Wood Thrush		1
	Red-eyed Vireo	3	2
	Black-throated Green Warbler		1
	Ovenbird	3	1
	Scarlet Tanager	1	
	Rose-breasted Grosbeak	1	1
5	Eastern Wood Pewee		2
	American Crow	1	
	Black-capped Chickadee	1	
	Veery	1	
	American Robin	2	1
	Red-eyed Vireo	1	2
	Ovenbird	1	1
	Rose-breasted Grosbeak		1

The patterns of spacial and temporal distribution in the years 1998 through 2003 pertained this year as well.

Veeries tend to be identified far more frequently in the earlier series than in the later series. Sixteen Veeries have been seen in the earlier series, 3 in the later, and 2 in both. This is true of Least Flycatchers as well; all 6 have been identified during the earlier series. No other species show this pattern; none show the opposite pattern.
